Overview

The **Patient Tracker System** helps patients, providers, and administrators manage appointments, medical records, and communication efficiently. Patients can access healthcare information and request refills on prescriptions online, while providers and administrators stay organized and have a reduced workload.

Key Features

- Patients can:
 - Create an account and log in to their account
 - Schedule and view their appointments
 - View their medical records
 - Request refills for their prescriptions
 - Communicate directly with their provider
- Providers can:
 - View Appointments
 - View Patient Medical Records
 - Refill Prescriptions for Patients

- Communicate with patients
- Administrators can:
- Schedule, reschedule, and cancel appointments for patients
- View full schedule

System Requirements

- Operating System: Windows, macOS, etc.
- Software: Web browser
- Backend: PHP and MySQL database
- Frontend: HTML(BBEdit)
